The following is an Examiner's Statement of Reasons for Allowance: The instant claimed combinations found within Independent Claims 1, 10, 16, 23, 30 and 34 are considered to be novel and unobvious in view of the Prior Art of Record. The combinations are drawn to temperature compensation for arc fault determination within an apparatus or method and include either specific connections of the sensing resistor to the first and second thermistors of the temperature compensation circuit or specific connections of the sense resistor to neutral on one of its ends and to a neutral pigtail on its other end. It is the opinion of the Examiner that these specific configurations in conjunction with the other limitations within the respective combinations are novel and unobvious in view of the Prior Art of Record. The teachings of Mason, Jr. et al. (6,678,137), appear to be closely related, but there does not appear to be motivation for modifying those teachings so as to meet the claimed combinations.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RONALD W. LEJA whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on (571)272-2800. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
